Tunis, Tunisia

TECHNICAL SKILLS

- Programming Languages: Python, SQL
- Frameworks & Libraries: Django, Pandas, NumPy, Scikit-learn, SpaCy, NLTK
- Core Expertise: Data Analysis, Machine Learning, Natural Language Processing (NLP)
- Modeling Techniques: Regression, Classification, Clustering, Predictive Modeling
- Databases: MySQL, PostgreSQL
- Tools & DevOps: Jupyter Notebook, Git, Docker, VS Code
- Data Cleaning, Feature Engineering, Data Visualization (Matplotlib, Seaborn)

LANGUAGES

- French: Fluent
- English: Professional
- Arabic: Native

PROFILE

Data Science Engineer passionate about artificial intelligence and data-driven innovation. With two years of professional experience in data analysis, machine learning, and natural language processing (NLP), he designs and deploys intelligent solutions to automate processes and support strategic decision-making.

PROFESSIONAL EXPERIENCE

Data Science Engineer - PwC Tunisia

January 2024 - October 2025

- Designed and implemented machine learning models for financial performance prediction.
- Developed NLP systems to automatically classify internal reports and client documentation.
- Built and integrated Django-based APIs to make data insights accessible across departments.
- Collaborated with consulting teams to translate analytical results into strategic recommendations.

Junior Data Scientist - Sofrecom Tunisia (Orange Group)

March 2022 - December 2023

- Built end-to-end data pipelines for customer behavior analysis.
- Developed supervised models (Random Forest, XGBoost) to predict customer churn.
- Implemented NLP techniques for sentiment and intent analysis on customer feedback.
- Automated ETL workflows and improved data quality through Python-based scripts.

EDUCATION

Engineering Degree in Data Science and Artificial Intelligence

National School of Computer Science (ENSI), Tunis

2019 - 2022
